## LAMBERTO, LAMBERTO, LAMBERTO

GIANNI RODARI

"Italy's most beloved children's book author, never before translated into English, has written our kind of kids' book: For adults, really, a fable inspired by the terrorism that struck Italy in the 1970s, with quirky illustrations and—hooray!—a bunch of bankers getting what's theirs. All in a beautiful package. A Melville House take on the form if ever there was one."
